1.2. WHAT IS MUT LOOKING FOR?

Mangosuthu University of Technology (MUT) operates multiple campuses comprising academic buildings, residences, laboratories, administrative offices, and support facilities that require continuous and reliable electrical maintenance to ensure operational efficiency, safety, and compliance with statutory requirements.

The University experiences frequent demand for routine, corrective, and minor electrical maintenance works, which are typically of low monetary value and fall within the CIDB grading designation of EB1 and EB2. These works are sporadic and arise on an as-and-when-required basis, making it impractical to procure services through a full competitive bidding process for each individual requirement.

To enhance procurement efficiency, ensure rapid response to maintenance needs, and maintain compliance with SCM principles of fairness, transparency, and cost-effectiveness, MUT seeks to establish a pre-approved panel of seven (7) suitably qualified and experienced CIDB-graded EB1 and EB2 contractors.

The panel will enable the University to:

- Ensure timeous response to electrical maintenance requests;
- Improve service delivery turnaround times;
- Maintain cost control through competitive quotations within the panel;
- Ensure compliance with relevant electrical standards and safety regulations; and
- Reduce administrative burden associated with multiple procurement processes.

1.3. SCOPE OF WORK:

The outsourced basic electrical maintenance services shall comprise the provision of comprehensive maintenance solutions across MUT facilities, which include, but are not limited to, the following:

1. Ad-hoc and Routine Maintenance Services

The contractor shall undertake day-to-day electrical maintenance activities as and when required, including minor repairs, fault rectification, replacement of defective components, and general upkeep of electrical installations to ensure continuous and safe operation.

2. Planned Preventative Maintenance Services (PPM)

The contractor shall carry out scheduled preventative maintenance in accordance with agreed maintenance plans, aimed at minimising equipment failure, extending the lifespan of electrical infrastructure, and ensuring compliance with applicable safety and regulatory standards.

3. Risk-Based and Emergency Maintenance Services

The contractor shall provide urgent and emergency response services to address electrical faults or failures that pose safety risks, operational disruptions, or potential damage to infrastructure. This includes conducting risk-based interventions and ensuring rapid restoration of services within stipulated response times.

Legend:

- EB = Electrical Engineering Works - Building
- CIDB = Construction Industry Development Board
- OPEX = Operating Expenditure
- CAPEX = Capital Expenditure
- OSHERQ = Occupational, Safety, Health, Environmental, Risk & Quality [Management]

4. Completed work must be signed off by the designated MUT representative before invoicing.
